## 2004 GOVERNOR'S MEDAL FOR SCIENCE AND TECHNOLOGY

February 2004

CONTACT: Heather Greenwall, (801) 538-8616

Gov. Olene Walker recently announced that the Utah State Advisory Council on Science and Technology is accepting nominations for the 2004 annual Governor's Medal for Science and Technology Award. The Governor's Medal is awarded as a symbol of recognition to those individuals who have provided distinguished service to the state of Utah in science and technology.

Nominations can be made in any one of four categories: **academic**, **science education**, **industry** (including independent inventors and entrepreneurs), and **government**. Any Utah citizen or organization may submit nominations. The team category nominations awarded in past years will no longer be accepted. Nominees must meet a residency of Utah requirement detailed in the "Procedures and Criteria for Selection" document located on the Internet at <http://dced.utah.gov/science/2002procedurecriteria.pdf>.

The awards recognize individuals who have made a significant impact and contribution to science and technology in the state of Utah. Candidate nominations representing Utah's biotechnology, computer technology and medical technology markets are strongly encouraged, but nominees are welcomed from any fields of endeavor.

The State Advisory Council on Science and Technology is responsible for administering the award and for recommending nominees to Gov. Walker. A one-page form, attached, is all that is needed to initiate a nomination. If preferred, this form can be accessed via the web at <http://dced.utah.gov/science/medal.html>. As needed, nominees selected from the first round of applications may be asked to submit a more complete application package. The nominations must be **received by 5:00 p.m. May 7, 2004**:
